I am a Data Analyst with a background in business and administration.

My goal is to find a position as a Business Analyst in Paris, that would allow me to develop my skills in data analysis and my ability to interpret the results.

HARD SKILLS

- Python, SQL, Tableau, MS Office.
- Data mining (APIs, Web Scraping), cleaning, preprocessing, modeling, and visualization.
- Supervised and unsupervised machine learning.
- Descriptive and predictive statistics.
- Business intelligence.
- Market analysis, marketing strategy, project planning, project management.

SOFT SKILLS

- Communication
- Teamwork
- Commitment

LANGUAGES

French: native

English: fluent

PROJECTS

Realization of 9 projects in data analytics and business intelligence:

- Python programming.
- Dashboard compilation on Tableau and Streamlit.
- MySQL queries, procedures, triggers.
- Data pipeline building with Pandas, NLP modeling, time series modeling.
- Supervised and unsupervised machine learning.

EDUCATION

Data Analytics Intensive Bootcamp (400h+) | May 2022 – July 2022

Ironhack, Paris, France

- Learned data analyst core skills: data cleaning, data manipulation, data mining, database management.
